Reilly Tar and Chemical Corporation
Super - Enforcement Coordination

Dale S. Bryson, Deputy Director
Enforcement Division

ORIGINAL SIGNED BY
DALE S. BRYSON

Bill Constantelos, Deputy Director
Enforcement Division

The January 27, 1980, meeting organized by the Superfund Office regarding the Reilly site in St. Louis Park, Minnesota caused something of a commotion at the U.S. Attorney's office in Minnesota. The U.S. Attorney has strongly requested that he be informed before any future meetings with personnel whose U.S. EPA are scheduled. Because of the relationships of the parties involved in the litigation, the U.S. Attorney is concerned about the potential release of any Federal strategy to Reilly. This will be especially true through the upcoming months when we will attempt to negotiate a Consent Decree with Reilly. To this end, the U.S. Attorney has also requested that no documents be released to anyone outside the U.S. EPA without clearance by him. Such a request should be coordinated through Bob Leininger or Melanie Toepfer.

Extra care must be taken to insure coordination between the Enforcement Division and the Superfund Office for those cases which have been filed in the Federal Courts. It is my hope that this coordination can be developed and maintained.
